Summer Institute

UDL: From Exploration to Application

Prior experience with UDL is a prerequisite

Universal Design for Learning (UDL) is a teaching framework that guides the design of **flexible learning environments to support individual learning differences**. Not a one-size-fits-all solution, UDL employs **flexible approaches** that can be **customized to scaffold and support learning**.

P.K. Yonge's new four-day summer institute **builds on foundational knowledge of the principles of UDL**. This institute **explores each guideline and examines design practices in educational environments that respond to learner variability**. Whether your UDL work is at the classroom, school, or district level, this institute will help **refine your understanding and outline the next steps in your own context**. Teachers, administrators, and educators in diverse roles in schools and districts are encouraged to join us for this opportunity.

If you can agree with the following statements, this institute is for you!

- ✓ I am familiar with learner variability.
- ✓ I have attended professional learning on UDL.
- ✓ I recognize the UDL principles and guidelines.
- ✓ I have seen, heard, or read about UDL in classrooms/schools.

June 12-15, 2017 9:00am-4:00pm
