

EXAMPLES OF FACE COVERINGS

HELP OUR CAMPUS COMMUNITY STAY SOCIAL, SAFER.

Ear loop/Procedure

N-95

Surgical

Cloth

Exhalation Valve Masks

Bandana

Neck Gaiter

UNAPPROVED FACE COVERING:

Masks with exhalation valves or vents allow air to be expelled. The CDC does not recommend these types of masks because they do not prevent the person wearing the mask from transmitting COVID-19 to others. In addition, neck gaiters and bandanas should not be worn unless no other face covering listed above is available to you.
