

Seeking Children for a Research Study with Augmented Reality (AR) Headsets!

Researchers at the University of Florida in the CISE Department are examining how to design visual information in AR headsets for children. We are seeking children (ages 9 to 12) to interact with an AR headset.

The study will take approximately 1 hour on UF campus. Children will receive a \$20 cash and a small prize for completing the study.

Contact the researchers at Julia.woodward@ufl.edu for more information.
